

Hydrangea aspera HYDREAM® Chocolate 'HCPF1'

A compact shrub with colourful foliage

It forms a small, well-stocked bush with long, slightly downy leaves and original colours.

Its chocolate-coloured foliage turns dark green with a dark red reverse in summer. Its beautiful umbels have a bluish centre and bright pink outer flowers, providing a lovely contrast with the foliage. It flowers from a young age and is frost hardy.

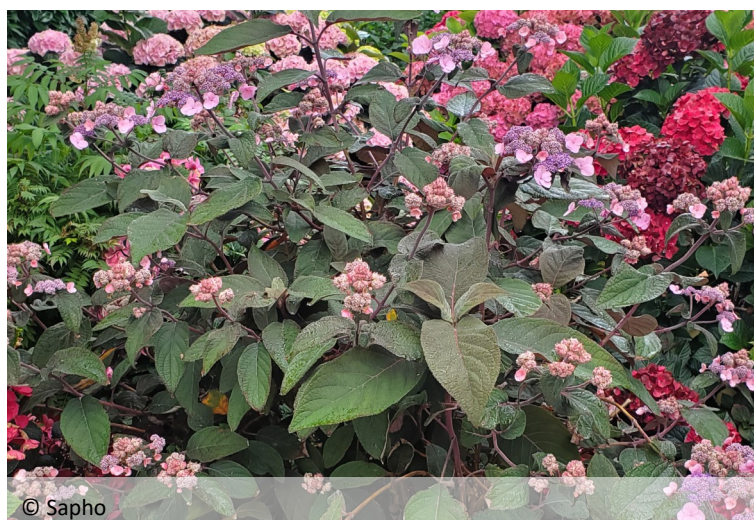

Its compact habit and smaller size make it better suited to small gardens than the Hot Chocolate variety.
