

Hydrangea paniculata

PRIM'WHITE® 'Dolprim'

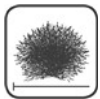

The first hydrangea paniculata of the season.

Flowering on the previous year's growth, the shrub is very early. It produces elegant white, slightly flat flower panicles. The abundant sterile flowers have large cream-coloured sepals. In good conditions a second flowering prolongs its decorative interest. This small plant with fine wood, pale green foliage and very red stalks is of small habit. Well branched, it has a regular shape and good growth. PRIM'WHITE® goes well in a shrub border or in a pot.
