

Lonicera periclymenum CHIC & CHOC[®] 'INOV205'

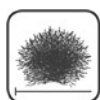

The CHIC of its perfumed flowers and the CHOC of its small silhouette!

The "CHIC" - the plant gets covered with very refined flower heads: purple to deep pink buds, pinkish white and then orangy yellow blossomed tubular flowers. This delicately scented cultivation is very floriferous and extends its flowering into September, in good conditions. The "CHOC": this honeysuckle is surprising due to its dense and reduced growth. Semi-evergreen to evergreen under temperate conditions. Can be used in pots or planted in the garden.
