

## Camellia japonica 'Kerguelen'

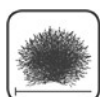

*The camellia with variegated foliage, decorative all year long.*

'Kerguelen', a mutant of 'Nuccio's Cameo', has double deep pink flowers with overlapping petals (mid-season). Its dark green foliage has pretty pale green and cream markings all year round. The variegation is stable. It is of average growth and compact shape. This variety is very resistant to disease and insects. Avoid direct sunlight and east winds. Attractive all year long, 'Kerguelen' will embellish peat borders and containers.
