

# Hydrangea quercifolia

## ICE CRYSTAL 'HQOPR010'

*Elegant toothed foliage  
and beautiful purple colour in autumn*

ICE CRYSTAL shows a beautiful light foliage with deeply toothed light green leaf blades. In autumn they take on beautiful shades of red, purple, Bordeaux, ....

The abundant cream coloured inflorescences appear in June-July and last after wilting.

The growth is upright and naturally well branched.

Very hardy, resistant to drought, this selection propagates easily and grows well.

ICE CRYSTAL can be planted in shrub beds or pots.
