

Choisya

SCENTED GEM 'LISSBRID'

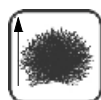

Pink buds and white flowers : an attractive two-tone effect

A two-tone effect, unusual in Choisyas: the white flowers are preceded by sweet pink buds contrasting with the already open flowers.

The pleasantly scented flowering starts early in spring, then reflowers sporadically.

The fine digital evergreen foliage is dark green and very shiny. SCENTED GEM of rounded shape without trimming and resistant to drought is an easy going plant.
