

Pieris japonica 'Little Frosty'

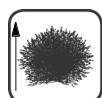

A superb decoration for terraces and small gardens

Tiny Pieris with finely elegant foliage, green with white borders and subtle tints of pink on the young spring shoots. Very compact and of limited growth but of ample vegetation, 'Little Frosty' is ideal for small spaces, tubs and garden edges. In spring, bunches of bright, white bell-shaped flowers appear. Plant in fresh, well-drained soils that are rich in humus, prune in summer.
