

# Agapanthus

## BLUE INFINITY® 'PANAGA'

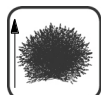

### *Exceptional globes of limitless blue flowers!*

Flowerheads that can reach more than 30 cm across, forming nearly perfect spheres carried on tall, stout stems that can grow to 1 – 1.50 m. An infinitely extending summer flowering, thanks to the development of fresh flower-spikes throughout the season. The clear blue colour typical of the Agapanthus is here enhanced with central stripes of dark blue on each petal. An Agapanthus that's a garden wonder!
