

Clematis SAPHYRA® Violetta

'CLEMINOV32'

All the qualities of SAPHYRA® Clematis, with the added bonus of purple!

The SAPHYRA® clematis range selects small-growth varieties that are resistant to disease, dryness and excess water, and require little maintenance. Violetta is distinguished by the color of its velvet-purple flowers, darker than the Indigo variety. It grows upright and can be used as ground cover, at the edge of a bed or wall, or in combination with a support plant.
