

Lavatera BLUE BIRD® 'RENLA V'

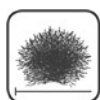

A new lavatera of surprising colours!

This new variety of small, shrub-like shape and grey-green foliage survives the winter well. From the beginning of June and for nearly two months, it is remarkable for its pretty flower heads with pale lilac petals, delicately veined with a darker purple. In good conditions, the flowering lasts until the end of summer. BLUE BIRD® adds an original note to shrub borders and flowering hedges because of the surprising colour of its flowers and by the tint and quality of its leaves all year long.
