

Ligustrum ibota MUSLI® 'Muster'

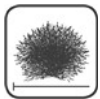

**Luminous shrub,
MUSLI® is noticeable from a distance.**

The leaves are evergreen to semi-evergreen and remarkable for their lasting variegation, highly resistant to the sun. The young shoots are light yellow, then creamy white. The shrub will produce clusters of fragrant white tubular, turning into blue-black berries. Adult, MUSLI® forms an even bush with a dense centre. It is of moderate growth. This shrub tolerates cutting back and is suitable in topiary, in a hedge. In the open or in a pot it is very remarkable by its bright foliage.
