

Physocarpus opulifolius

DIABLE D'OR[®] 'Mindia'

*In springtime light,
pretty copper shimmering foliage.*

This shrub is remarkable for a dense, deciduous jagged foliage with its original orange copper shades in spring, turning to purple in summer and autumn. It prefers a sunny position to develop its beautiful colours. It has bushy habit, dense, stocky with strong, straight branches.

White flowers bloom from May to June. They are followed by red fruits at the end of summer.

DIABLE D'OR[®] suits well in mixed free hedges.
