

Salvia x jamensis 'Melen'

Compact, delicate due to its yellow - brown contrast from May to October.

'Melen' has been chosen:

- for its even, compact and well-branched shape.
- and for its early and abundant flowering from May to the first frosts.

The colours of the flowers bring originality to the Salvia range: the corolla is pale yellow and the edge of the top lip orange in contrast with the dark brown calyx.

The dark green leaves are semi-evergreen and aromatic. An easy plant for the garden or in a pot.
