

Salvia x jamensis

VIOLETTE DE LOIRE[®] 'Barsal'

Original violet from May to the first frosts.

Our range of salvia has grown richer with this variety of a brand new colour. The flowers are of an intense, velvety violet, with a purplish blue light in its centre. The flowering starts abundantly in May and continues until the first frosts.

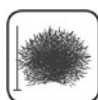

VIOLETTE DE LOIRE[®] has an upright and well-branched shape. The foliage is small, dark green, semi-evergreen and naturally aromatic.

An easy plant for the garden or in a pot.
