

Agapanthus

PITCHOUNE® Blue 'Scrarey09'

PITCHOUNE® Blue, a beautiful dense blue African lily

This selection combines a dense shape and good-sized flower heads on short, thick stems. Made up of numerous flowers, the big clusters, of a deeper blue, bloom in June–July. Their flowering is good. The leaves are wide and evergreen. PITCHOUNE® Blue prefers being exposed to the sun, which makes it denser, but also blooms well in partial shade. It must be protected in cold areas. In frost-free open grounds or in containers.
