

Photinia serratifolia CRUNCHY® 'REV100'

A Photinia with original foliage: toothed chocolate coloured leaves

The originality of the foliage brings a revival to the Photinia. The leaf blade is undulated and finely toothed. The young shoots, copper at first, take on the unusual chocolate shade, and then turn dark green. CRUNCHY®, tested in nurseries for several years, performs well: it branches and develops well in containers, its growth is good. Hardy, it keeps its leaves in winter. Good resistance to powdery mildew. Recommended for hedges, with or without clipping.
