

## Ginkgo biloba 'Blagon'

### *The pyramide shaped maidenhair tree*

Moderate dimensions and a pyramide shaped even growth allow this beautiful Ginkgo to be used in gardens, planted in rows or in large containers. It is rustic, resistant and adapts well to urban conditions.

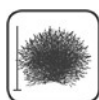

'Blagon' is spectacular in autumn due to its golden yellow colour.

For 20 years, the original stock plant has not told the secret of its "flowers": male or female?
