

Elaeagnus x ebbingei **MARYLINE® 'ABRELA'**

An original colour and a very even growth for this new Elaeagnus

The foliage is widely variegated in a creamy yellow which gets stronger with the seasons. This shrub stands out from far away due to its luminosity.

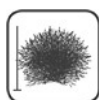

Its good ramification, its compact shape, its evenness, make it an excellent container plant and is easy to use in the garden.

Reacting well to pruning, it can be used in a hedge.
