

Sambucus nigra **BLACK TOWER 'EIFFEL 1'**

**Dark purple elder
with an upright and thick shape.**

BLACK TOWER has an interesting upright and naturally thick shape.

Its young shoots are green. Then the large-sized foliage becomes deep purple brown, covering the plant from the base upwards.

From a very young age, nearly at every node, numerous quite small pink and white flowers open, contrasting with the foliage.

Black fruit appear in the autumn.
