

Agapanthus PITCHOUNE® White 'TUR161'

From the PITCHOUNE® range, a vividly reblooming white agapanthus

All the advantages of the PITCHOUNE® range: very compact habit, good sized inflorescences on short, quite thick stems. The variety is outstanding for regularly renewed flowering from June to early September, under good conditions. Few grains are produced. Thanks to its reduced dimensions, its evergreen foliage and long and dense flowering, PITCHOUNE® White is ideal, grown in pots or in the soil in areas of temperate climate.
