

# Sorbaria sorbifolia

## PINK HOPI® 'COUSORB05'

*A foliage with long lasting colours,  
a growth that stays compact*

The foliage is light and harmoniously layered. It is a remarkable plant, due to its young variegated shoots which are red, pink and cream, then veined with white. This colourful period lasts a month longer than with traditional varieties. The foliage later turns green. The shape has the advantage, compared to 'Sem', of staying compact and this selection produces less suckers. The white flower panicles bloom in Summer. The shrub does not need treating or pruning.
