

Passiflora

RIVERSIDE® 'Damsel's Delight'

Walls, trellises and pots : big decorative flowers from May to the frosts

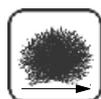

This polyploid hybrid is evergreen in mild winter regions but must be protected under -8°C. The big foliage is dark green and shiny.

From May on several flowers appear daily. They have a white corolla with shades of lilac and the filament crowns are beautifully dark violet purple and blue. The scented flowers last several days. Non-edible fruits are rare.
