

Clematis texensis

QUEEN MAXIMA® 'Wellmax'

Big dark pink, tulip-shaped flowers

QUEEN MAXIMA® flowers between June and September. This climbing plant has abundant large tulip-shaped flowers at the end of its stems. More impressive than the flowers of 'Princess Diana', they can reach a size of 9 to even 10 cm! The four sepals which make up the 'tulip' are of a dark, almost red, pink and are very bright. The plant is robust. It is grown on a stake or can be used as ground cover.
