

Photinia x fraseri **LOUISE 'MCLARLOU'**

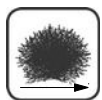

Beautifully mixed colours and an upright and regular form

The colours of the persistent and variegated foliage add cheerfulness throughout the year. Photinia Louise has also been selected for its vigorous, erect growth and its ample vegetation, regular, compact and dense. Young shoots are bright red spotted with pink. The leaves then thicken and become green, spotted with creamy white. Of simple upkeep, needing little trimming, it is perfect for hedges or with other shrubs in a bed.
