

# Hydrangea paniculata

## POLESTAR® ' BREG14'

### *A cloud of cameo flowers until the end of summer*

POLESTAR® is exceptionally precocious (from end of May on) and generous with its flowers that cover the entire plant. Their colours change from green-white in June, to creamy yellow, light pink and finally an intense pinky red at the end of summer. Very compact, easy to manage and not very demanding. POLESTAR® is perfect for a large tub, small gardens or in the front of a bed. Limit pruning to a simple tidying up of the wilted flowers.
