

Forsythia

MARÉE D'OR[®] 'Courtasol'

*The first ground covering Forsythia,
a STAR for over 25 years!*

MARÉE D'OR[®], about 0.80 m high and 1.50 m wide, layers naturally and has all the qualities of a good ground cover. It can be used grouped on banks, guide islands, roundabouts and their green areas. It can stand being planted on slabs, in containers and flower boxes... Its grapefruit yellow, abundant flowers are early, in February - March, depending on the regions and climate. The light green foliage comes after the flowers and covers the stems completely.
