

Lavatera SONG BIRD 'JOBIRD'

Simultaneous tints ranging from white to pink

Over a period of 7 days, each flower is pure white when it emerges, gradually gathering shades of pink to finish a vibrant pink. Very floriferous all through the summer, bearing multiple flowers at different stages of its growth, 'Song Bird' thus offers a bouquet of different shades.

Light green, quite long and jagged foliage; the thin wood and reduced habit makes for a well-balanced shrub.
