

## Clematis x CHIBI® 'NIIDA'

*A Clematis ideal for small gardens and in pots*

CHIBI® is a new, compact, small-growing Japanese clematis, particularly interesting for small gardens or pot cultivation. Its large, bright-pink flowers (13 - 18cm) start to bloom in May and continue throughout the summer. The flowers are very numerous, with lighter petals in the center and reddish-pink on the outside.
