

Leucothoe axillaris

MAGICAL® 'ReJoyce'

Beautiful, colourful evergreen foliage

This small shrub is attractive all year round, thanks to its beautiful, healthy evergreen foliage with changing colours. In spring, the flamboyant red young shoots contrast with the brilliant green foliage. In autumn, the foliage takes on a wine-red colour that lasts throughout the winter.

The spring flowering offers short, elegant white bunches along the branches.

This spreading shrub is ideal for covering undergrowth or a shady slope. It can also be grown in containers to enhance a terrace.
