

# Parrotia persica

## Golden Bell Tower® 'Chrishaven1'

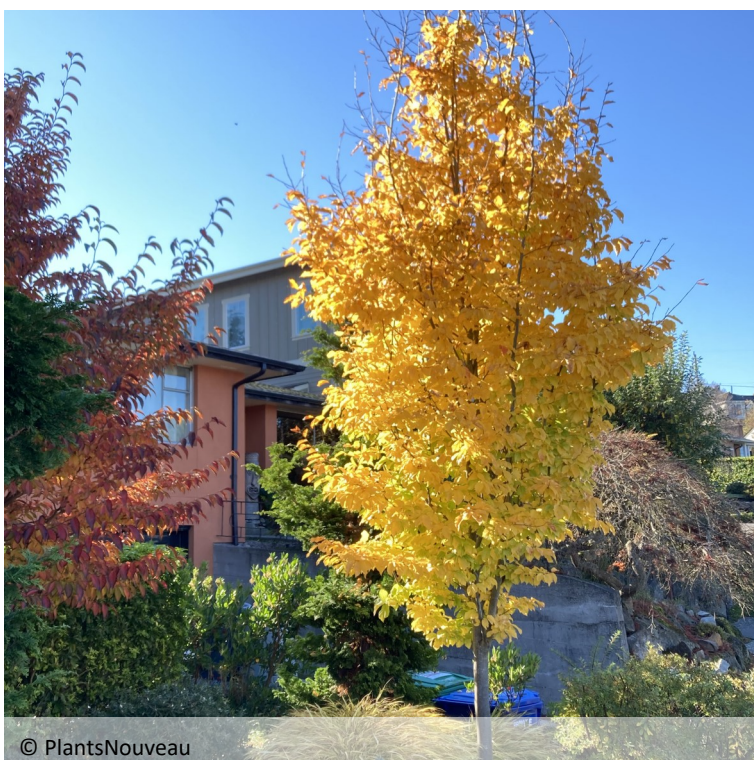

*A tree with sublime colours and an original, upright shape*

This variety has all the qualities of the Parrotia: robust and hardy, with beautiful autumn colours, disease-resistant, tolerant of different soils and low maintenance.

It stands out from the typical species because of its very upright habit, which is maintained with age. It can therefore be planted in smaller or narrower spaces. Its soft green foliage, changing from golden yellow to apricot, will brighten up your garden in autumn.
