

Hydrangea paniculata

Living Little Rosy® 'LCNO16'

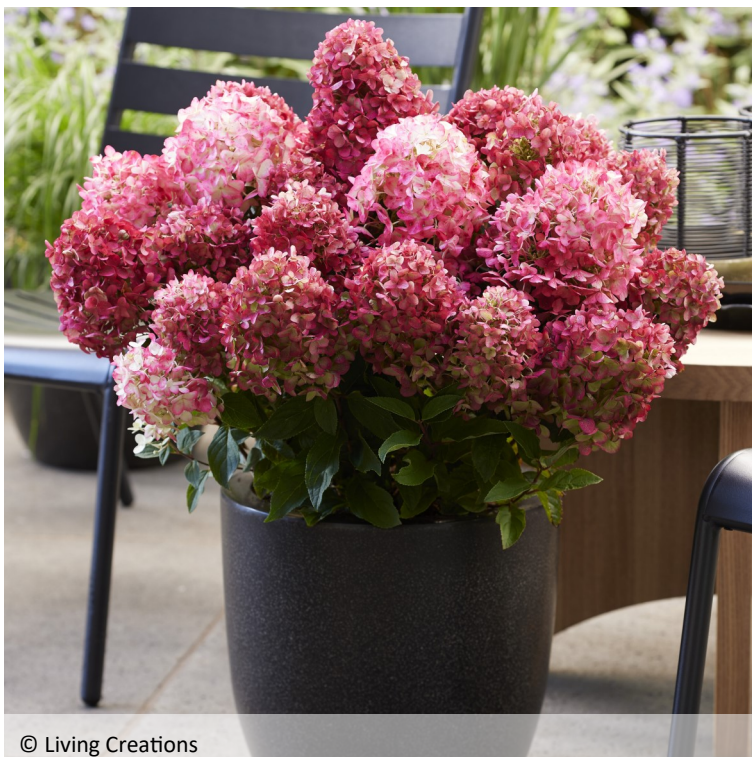

A profusion of flowers in rapidly pinkening panicles

This variety of panicked hydrangea has a generous white bloom, rapidly changing to a deep pink during the summer. It is a small, compact shrub with very dark green foliage.

The Hydrangea paniculata in the Living Creation® range have been selected for their strong stems, the quality and duration of their flowering and their original colours. The Little series groups together varieties of small growth, particularly suited to pots and small gardens.
