

Hydrangea paniculata

Living Sugar Rush® 'LCNO11'

A hydrangea with large panicles that stay white all summer long

This variety produces abundant flowers that stay white all season long. Its large inflorescences are borne on strong, upright stems. Vigorous and medium-sized, this shrub is perfect in the ground, as an isolated specimen or in a bed.

The Hydrangea paniculata in the Living Creation® range have been selected for the strength of their stems, the quality and duration of their flowering and their original colours.
