

## Lagerstroemia indica **BRAISE D'ÉTÉ® 'Indybra'**

**A very early fire-red  
in the INDIYA CHARMS® range.**

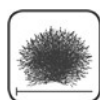

The varieties of the INDIYA CHARMS® range have been selected for precocity and quality of flowering, more suited for mild summers. They are resistant to low temperatures and to powdery mildew. As clumps or stem-grafted they offer bright colours.

**BRAISE D'ÉTÉ®:** The very early flowering is remarkable because of its very dense, good-sized, intense red thyrses, from the beginning of July onwards; in the right conditions, there is new flowering at the end of summer.
