

Salvia x jamensis 'Pluenn'

Bright pink flowers from May on, repeating beautifully in autumn.

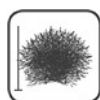

'Pluenn' has been chosen:

- for its extremely even, compact and branched shape
- and its early abundant and long flowering: beautiful bright salmon-pink flowers appear from May to the first frosts.

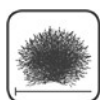

The elongated dark green leaves are semi-evergreen and naturally aromatic.

An easy plant for the garden, in well draining soil, also tolerates being planted in a pot.
