

Hibiscus syriacus

FRENCH CABARET® PASTEL 'MINDOUB1'

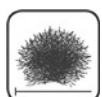

*In the FRENCH CABARET® range,
a subtle alliance of white and pink*

Sterility, vigor and flowering characterize the series FRENCH CABARET®. Between July and mid-October, depending on the varieties, elegant double pompom flowers remind us of the skirts of Parisien cabaret dancers. The selection PASTEL is delicately white and pink. Thanks to the lack of fruit bearing, the plant does not depreciate after wilting and new flowers bloom easily. The range tolerates dry and chalky soil and is not sensitive to Sclerotinia.
