

Hibiscus syriacus

PINK CHIFFON 'JWNWOOD4'

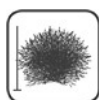

The charm of the CHIFFON range and pink flowers with a red heart

The flowers of the CHIFFON range, partially petaloid, have the aspect of "silk muslin". After wilting, they don't stay on the plant. These selections with abundant summer flowers are particularly elegant and light.

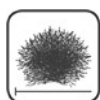

Being of vigorous growth, they keep their branched shape well.

PINK CHIFFON, with its pink flowers veined with red in the centre, goes harmoniously with the other varieties of the series distributed by SAPHO.
