

Abelia x grandiflora

PINK LADY 'KEYLAD'

Delicate foliage variegation for this very dense shrub

The delicate small sized foliage show off a marked variegation: bright pink, then white, finally pale pink at the end of the season. The young stems are purple-red. The growth is very dense, cushion shaped, its dimensions are reduced.

The subtle alliance of tones on the same plant, the slow growth and the pale pink flowers in summer make it perfect for pots. Grown outside, PINK LADY lightens up the borders of beds.
