

Loropetalum chinense

EVER RED 'Chang Nian Hong'

Remarkable bright red flowers and beautiful purple foliage all year long

The evergreen EVER RED® is noticeable for its foliage, which stays very deep purple all year long. Its growth is dense, upright and spread out. The particularly spectacular flowering goes from February to May, depending on the climate. The beautifully sized pompom shaped flowers are of a full red, highlighted by the dark foliage. EVER RED® can be planted alone, in beds or in pots, in half shade or light sun.
