

Perovskia atriplicifolia

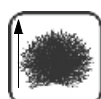

SILVERY BLUE 'Lissvery'

*Bright, dense and upright,
with lavender blue flowers until autumn*

This bright variety of Perovskia is dense and upright and maintains its beautiful shape. Its aromatic foliage is silvery grey-white, the robust stems have metallic highlights. Slightly scented lavender blue flowers come out first in June-July. Pruning in early August allows a second, denser flowering. SILVER BLUE is resistant to drought, prefers a sunny spot, but tolerates half shade.
