

Physocarpus opulifolius **ALL BLACK® 'MINALL2'**

*The most dense and the darkest
of the Physocarpus with purple foliage*

ALL BLACK® is remarkable because of its colours: in spring the young shoots are of a beautiful bright red-purple. The dense foliage then takes on a darker, nearly black shade.

The small ball shaped, white inflorescences are followed by red fruits in summer.

Its growth is bushy, round, well branched and stays moderate. Being really compact it is ideal for small containers and smaller gardens.
