

# Spiraea japonica

## LITTLE FLAME® 'MINSPILO4'

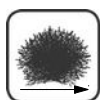

*Radiant foliage with evolving colours, compact shape and summer bloom.*

This fine improvement on 'Goldflame' is particularly admired for its more compact habit and their glossy leaves with changing colours: in spring, the tips of the young shoots are bronze-orange, the leaves are golden green in summer, then orange with coppery tints in autumn. Its carmine rose flowers appear in umbels in summer.
