

# Spiraea japonica

## Zen'Spirit® Caramel 'MINSPRIZ02'

*Seductive caramel-orange foliage growing in the form of an inviting cushion.*

A bush of restrained growth, compact habit, forming a dense cushion, notable for its young caramel-orange foliage that persists for several weeks before turning green. Pruning this plant will encourage a repeat performance. In autumn the foliage develops beautiful red tints. Its purple-pink, summer flowers are typical of Japanese Spiraea.

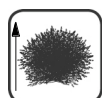

Ideal for rockeries, borders or in tubs.
