

Hibiscus x Fujin® 'AKATA204'

*Superb blooms and reduced size, a moscheutos
Hibiscus type for growing in pots*

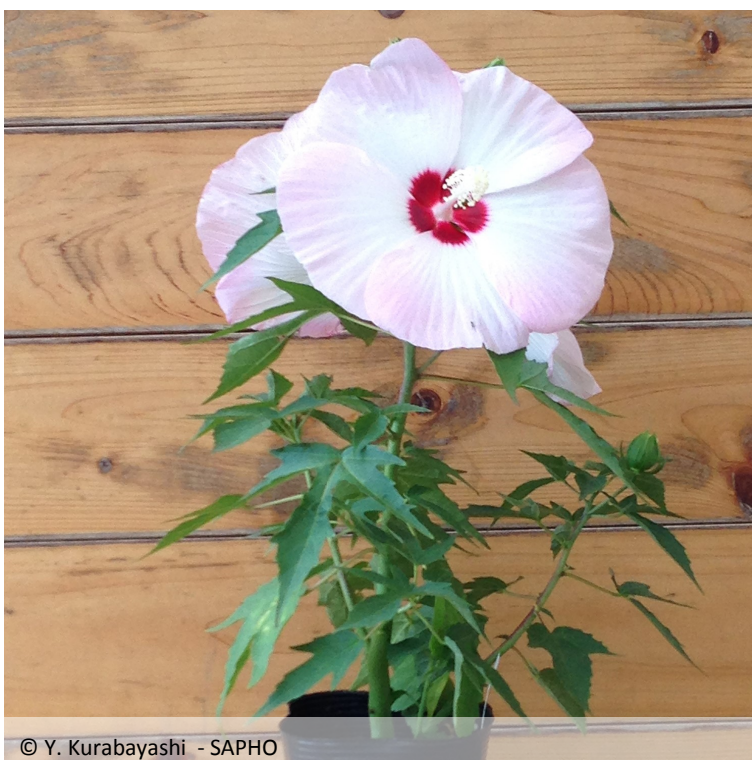

Superb white flowers with petals powdered in soft pink, garnet at the centre.

A plant particularly suited to growing in pots thanks to its naturally compact habit and ready branching.

Numerous flowers beautifully proportioned to the size of the plant, from July and continuing throughout the summer. Pruning can encourage late flowering. A perennial plant with clear green, highly indented foliage.
