

Callicarpa bodinieri **MAGICAL®** Snowstar 'KOLMSNOSTAR'

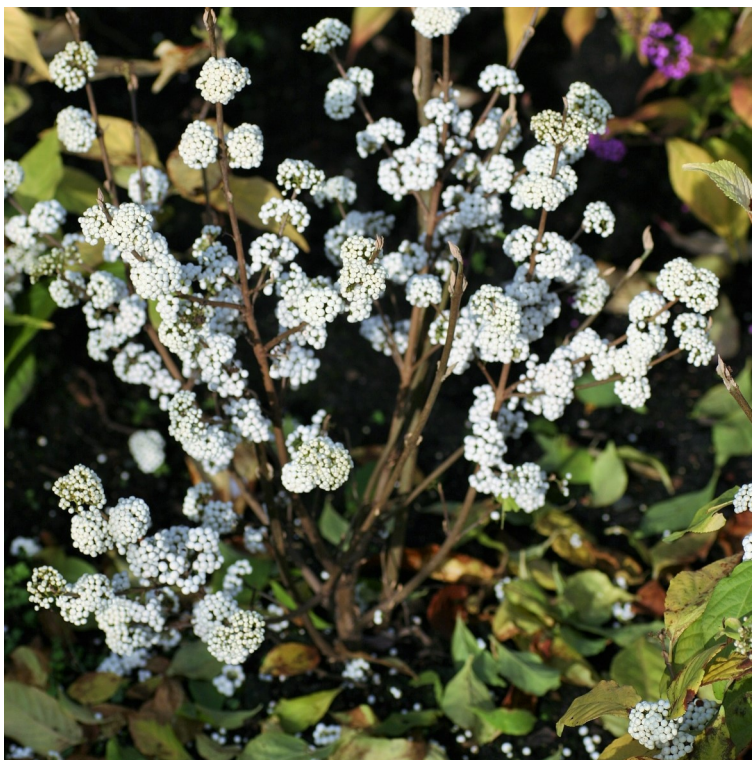

A set of precious white pearls for the autumn garden

This beautiful shrub lights up the garden in the autumn, when its leaves turn yellow and then fall off, revealing abundant clusters of sparkling white berries spread along the vertical stems. It can also be used to produce gorgeous bouquets of cut branches.

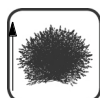

Easy to grow, it is fully hardy and resistant to drought. Pruning 2/3 of the previous year's growth is recommended at the end of winter.
