

# Lonicera nitida **GARDEN CLOUDS®**

## Purple Storm 'GRLN02'

*A shrubby honeysuckle with magnificent purple shoots*

This easy-care shrub is equally at home in pots or in the ground, and will enhance your garden, borders and low hedges with its fine, glossy green leaves and dark purple new shoots. Its dense habit makes it easy to form into a topiary. What's more, it adapts to all soils and is more resistant than the classic honeysuckle.
