

Hydrangea paniculata

DENTELLE DE GORRON® 'RENCRI'

Laced panicles...

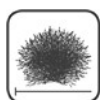

This variety has been selected for its early flowering, from June. It is remarkable for the abundance and lightness of its white flower heads, shaded with green, then turning creamy white. Each panicle is made up of a cloud of small and sterile flowers. Being supported by a long pedicel and having fine petals, all together they give a nice feathery look, reminding us of lace. Few fertile flowers.

DENTELLE DE GORRON® has a round, compact and well branched shape, and is of moderate growth. It goes well in a shrub border together with perennials or in a pot.
